Dr. Pyke is a broadly trained environmental scientist with expertise in climate change, land use, and sustainable design. Dr. Pyke helps clients link big picture concepts with detailed quantitative analysis to support their goals for greenhouse gas mitigation and adaptation to changing climatic conditions.

Dr. Pyke is currently involved in a variety of projects where clients are striving to avoid risks and create competitive advantage through the management of greenhouse gas emissions. This includes assisting projects with greenhouse gas inventories and analyses to support land use permitting and entitlement subject to the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA). Prior to joining CTG, Dr. Pyke served as a scientist with the U.S. Environmental Protection Agency, where his work focused climate change impacts.

Dr. Pyke is the Director of CTG Energetics' Washington DC office, and he heads the firm's climate change practice nationwide.
